-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The IDS of 7/21/03 has been considered in full.

Drawings

3. The drawings, as originally filed, are acceptable as formal.

Specification

4. The abstract of the disclosure is objected to because it needs to be in proper idiomatic English. Correction is required. See MPEP § 608.01(b).
5. A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Claim Objections

6. Claims 1-9 are objected to because of the following informalities: The claims must be reviewed for proper idiomatic English. Examples follow.

Art Unit: 3682

Claim 1, line 2, "unit" should be --units--.

Claim 1, line 4, "means of" should be --means of a--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are replete with language which is indefinite. The claims must be reviewed in their entirety for compliance. The following are examples of language which is vague and indefinite.

Claim 1, line 1, the use of "hex-axis" is indefinite since hexa means six and it is unclear how there are six axes. It is understood that there are six degrees of freedom.

Claim 1, line 2, "the same structure" is indefinite since it is unclear what structure this is referring to.

The recitation towards the end of claim 1, "and the transmission-joint yoke mechanism is pivoted to the corresponding sliding seat to enable 1 degree of freedom" is indefinite in that it is not clear how the yoke is pivoted "to the corresponding sliding seat".

Art Unit: 3682

The claims are replete with structure which lacks antecedent basis. For example, in claim 2, "the servo-driving mechanism", "the corresponding sliding seat", "the precise control". Claims must be reviewed in their entirety.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Akeel (5,987,726).

Akeel shows the claimed invention where three sets (see the upper platform (43h) which has three sets of actuators providing motion); the three sets of actuators are in pairs and are driven by electric motors (37) which provide the upper platform six degrees of freedom; each of the actuator rods (one being (34)) have a stationary member connected to the base (32) and a sliding member (as at (57)). The control of the upper platform being by the extension and retraction of the six individual actuators.

Allowable Subject Matter

11. Claims 3-5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 3682

12. Claims 6-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

13. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
